

GENERAL PHILOSOPHY

The philosophy of TCSC is that which stresses quality medical care to patients provided in modern, technologically advanced offices utilizing highly skilled, personnel. It is one that emphasizes research and development in patient care methods, innovative delivery techniques, and excellence of care. It is this philosophy that brings strong competitive value to the community.

The cornerstone of any medical practice is patients. It is the very purpose on which our existence is based. Patients expect to be treated in a friendly manner. They require understanding of their needs and prompt, efficient treatment of their condition. Our business exists to meet the needs of our patients -- to contribute to their welfare with the excellence of our products and services.

Business decisions have significant impact on our communities' welfare. The public has every right to expect its corporate neighbors will act as responsible citizens. We will work hard to meet those expectations by maintaining an awareness and support of our communities' needs. We will give financial support when we are able and encourage active participation of our employees as volunteers. Although TCSC is a business enterprise serving people, we have many obligations to our community. We intend to accept that responsibility.
